

ANDRIJA STANIŠIĆ

FULL-STACK DEVELOPER

PROFILE

Full-stack developer with professional experience building enterprise web applications using React, TypeScript, Symfony, and SQL. Experienced in designing maintainable systems using DDD, SOLID, and clean architecture principles. Available for flexible part-time and freelance engagements.

WORK EXPERIENCE

Devione

NOV 2025 - PRESENT

Full-Stack Developer

- Developing enterprise web applications using Symfony, React, TypeScript, and Redux Toolkit
- Designing modular systems following DDD, SOLID, and clean code principles
- Developing and maintaining REST APIs and frontend features across the full application stack
- Delivering software solutions in an enterprise environment for The Coca-Cola Company

HONORS & ACHIEVEMENTS

- Selected for Microsoft Development Center Serbia Career Booth Experience (Invite-only), November 2025
- Invited after successfully passing Microsoft's coding assessment
- 2nd place, "Evropski dnevnik" competition, 2021 (team of three)
- Accepted to AMD Developer Hackathon (May 2026)
- Qualified for invite-only on-site finals in San Francisco

SELECTED PROJECTS

Loop 9 — Unreal Engine 5 (C++)

- Developed a psychological horror game featuring AI-driven interactions, dynamic player states, and branching gameplay systems.
- Designed modular gameplay systems and immersive UI supporting multiple gameplay outcomes.

Tic-Tac-Toe — Unity (WebGL)

- Developed a cross-platform game with interactive UI and structured game logic
- Applied MVC-inspired architecture for clean and maintainable code

MovieVerse — Full-Stack Web Application (Academic Project)

- Developed a full-stack application using React, Express, TypeScript, and MySQL with JWT authentication
- Implemented user management, ratings, and admin dashboard with full CRUD functionality
